Key words Bloods Groups. Tribe. Variation.

ABSTRACT The distribution of the ABO blood groups has been studied among tribes of Changlang district of Arunachal Pradesh. Present findings indicate that A is higher than B among the Longchang and other tribals (i.e., Jugli, Morang, Singpho, Nocte, Tutsa etc.) While among the Muklom Both A and B show equal occurrences. It is also evident that there is no significant intergroup difference in respect of ABO blood groups among different tribes inhabiting this district of North Eastern Indian state Arunachal Pradesh.
