**KEY WORDS** Bhoksas. Uttaranchal. Blood Pressure.

**ABSTRACT** A blood pressure survey has been conducted on 286 Bhoksas individuals (151 males and 135 females) aged between 6 to 68 selected by purposive sampling from three village of Dehradun district. In both sexes, mean blood pressure level shows a gradual rise with advance in age and weight. In all, the blood pressure of Bhoksas (both male and female) is within normal range indicating their good health.
