ABSTRACT The present study was conducted at Kumarganj, Faizabad District of Eastern Uttar Pradesh. The purpose of the study was to assess family environment of adolescent girls and its impact on their socio-emotional adjustment. One hundred adolescent girls of age group between 17-18 years comprised the sample of the study. Family Environment Scale (FES) and Adjustment Inventory for School Students (AISS) were administered. Data was analyzed in terms of percentage and multiple regression analysis. The statistical analysis revealed that all the eight family environment factors, viz. cohesion, expressiveness conflict, acceptance and caring, independence, active-recreational orientation, organization and control together showed significant role in socio-emotional and educational adjustment of adolescent girls.
