KEYWORDS Emotional intelligence; police; gender; job status; marital status

ABSTRACT This study used an ex-post facto approach to assess emotional intelligence in the Nigeria Police. In the study, emotional intelligence of participants was content-rated using Emotional Intelligence Test. With a sample of 285 police (officers and men), the results indicated that Nigerian police are not emotionally intelligent when they were tested on the following variables: gender ($t = .692, > 0.05$), age ($t = .66, > 0.05$), job status ($t = .36, > 0.05$), marital status ($t = 1.1, > 0.05$), and years of experience ($F = 1.372, > 0.05$). The results indicate the need for the Nigerian Police to embrace emotional intelligence.
