KEYWORDS Birth Control. Knowledge. Attitude. Practice. Mao. Fertility

ABSTRACT It is presently attempted to assess the knowledge, attitude and practice status of birth control measures among the Mao Nagas of Manipur. Different modern birth control measures though widely propagated yet few persons adopted them. Indigenous birth control methods are not prevalent. There are various factors which influence the acceptance of birth control methods. Educational status of the mother and the economic status are presently found to significantly influence the acceptance of birth control measures among the Maos.
