Genetic Markers in Human Blood

M. K. Bhasin and H. Walter

KEYWORDS Population Genetics. Breeding Population. Polymorphisms.Blood Groups. Serum Proteins. Red Cell Enzyems. Haemoglobin Variants. HLA. DNA

ABSTRACT The human population genetics incorporates study of biology and environmental factors, as well as the forces of micro-evolution leading to macro-evolution, which ultimately influences the structure of human populations. In the present paper and attempt has been made to a give a brief review of the genetics and distribution of some of the polymorphic traits - blood groups, human leucocyte antigens, serum proteins, red cell enzymes, haemoglobins and DNA.
